## DETAILED ACTION

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 5, 6, 9, 10 and 12-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Wu.

Relative to claims 1, 10 and 19, Wu's Fig. 1 illustrates a media, which includes video, (note col. 1, lines 13-15 and 35-38) processing filter (note col. 2, lines 17-20) engine including a first memory unit (multi-port memory M and the topmost output port that feeds rs21) and a second memory unit (multi-port memory M and the middle output port that feeds rs11) and a single instruction, multiple port, SIMD, processor (note col. 1, lines 54-56 and the abstract.

Relative to claim 1, the last paragraph reads on retrieval of all bits of a memory location because when all bit of a memory location having 2m bits are retrieved the retrieval includes the m most significant bits.

Relative to claims 10 and 19, the claimed first and second shift registers correspond to Wu's Fig. 1 shift registers rs21, rs22, ... , rs2n and rs11, rs12, ... , rs1n, respectively. Relative to the recited selective shifting by a predetermined number of bits corresponding to the number of bits used to represent one pixel note that when Wu's shift register rs21-rs2n receives the shift/load control signal1 (col. 3, lines 37-38) the loaded data is shifted the number of bits that

correspond to the pixel size. Relative to claim 19, when Wu's shift register rs21-rs2n receives multiple shift/load control signals then the data element or pixel is shifted a predetermined number of bits corresponding to a multiple of the number of bits used to representing one data element or pixel wherein multiple is greater than 1.

### Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
4. This is a RCE of applicant's earlier Application No. 10/786,195. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DAVID H. MALZAHN whose telephone number is (571)272-3727. The examiner can normally be reached on M-Th from 7:30 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lewis A. Bullock Jr, can be reached on 571-272-3759. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
